

## ICare Prevent

ICare Prevent is an Online-Training which will be adjusted individually on the person in accordance with his or her suffering. The online-platform combines evidence-based prevention, early diagnosis and treatment of common psychological disorders. For participating, interested people can fill out a form on the website. The next step will be to fill out questionnaires in order to find out whether the interested person fulfils the requirements. One group of participants will attend the training directly and the other one after a waiting period of 12 months because the effectiveness of the training is examined scientifically. Components of the training are the relation of unfulfilled needs and psychological well-being, development of depressive moods, anxieties and other negative feeling as well as reduction of these and learning of strategies to overcome individual complaints.

### Description

ICare Prevent is a 7-week-long Online-Training to strengthen psychological well-being for people who feel subdued, sad or depressive, miss vitality or energy, ruminate, are restricted because of anxieties or have unsolved problems. The training will be adjusted individually depending on what the person suffers from. Participants will be trained systematically in using strategies like problem solving and activity planning for strengthening important aspects of life and psychological well-being as well as reducing psychological complaints. It is not appropriate for people who were diagnosed with a psychosis in the past, who suffer from a changed perception of the own person, sense of identity, perception of direct feelings as well as control of body movements. The first step of participation is to fill out questionnaires as well as a telephone interview so that it can be found out whether the person fulfils the requirements. After accepting participation the participant will be randomly assigned to one of two groups. Because the effectiveness of the training is examined scientifically, the participants can't get access to the training all at the same time. 2/3 of participants will attend the training which consists of 7 lessons which take around 45-60 min. They learn how unfulfilled needs and psychological well-being are related, how depressive moods, anxieties and other negative feelings occur and how to reduce them as well as individually adapted strategies for overcoming individual complaints. The other 1/3 of participants gets access to the training after a waiting period of 12 months.

ICare Prevent is a cooperation project within the project ICare – Integrating Technology into Mental Health Care Delivery in Europe and is funded by the European Union. The goal is to establish an innovative, comprehensive supply model for facilitating psychological health in Europe. It combines evidence-based prevention, early diagnosis and treatment of common psychological disorders on an online platform. It aims to supplement existing offers in cooperation with established actors of health care or to be integrated in these in order to avoid and reduce long-term costs which arise through psychological diseases. The project partners stem from six European countries; these are Germany, Austria, Switzerland, Great Britain, the Netherlands and Spain. Interested people can fill out a form on the website in order to sign in for participation in the study.

The banner features a background image of a person climbing a rope on a wooden structure over a body of water under a cloudy sky. The text is centered and reads: 'Willkommen zu ICare Prevent', 'Dem Online-Training zur Stärkung Ihres psychischen Wohlbefindens', 'Ist das Training für mich geeignet?', a list of seven questions, a paragraph about the training's suitability, and a 'JETZT ANMELDEN' button.

## Willkommen zu ICare Prevent

Dem Online-Training zur Stärkung Ihres psychischen Wohlbefindens

Ist das Training für mich geeignet?

- Fühlen Sie sich niedergeschlagen, traurig oder depressiv verstimmt?
- Vermissen Sie Ihre Lebensfreude?
- Haben Sie den Kopf voll Grübelgedanken?
- Schränken Ängste Sie in Ihrem alltäglichen Leben ein?
- Fehlt Ihnen die Energie, um etwas zu unternehmen?
- Fühlen Sie sich von Ängsten und Sorgen bedrückt?
- Oder haben Sie keine Freude mehr an Aktivitäten, die Ihnen früher Spaß gemacht haben?
- Machen Ihnen ungelöste Probleme den Alltag schwerer als nötig?

Wenn Sie sich in einem oder mehreren Punkten wiedererkennen, könnte eine Teilnahme an ICare Prevent der richtige Schritt für Sie sein. Das Training wird dann individuell auf Ihre Bedürfnisse zugeschnitten.
